

EXPERIENCE

iOS Engineer at Celestial system pvt. ltd Noida

March 2024 - Present

- Experienced iOS Developer with expertise in Swift, UIKit, SwiftUI, REST APIs, Core Data, and cloud integration.
- Modernized legacy codebases, resolving issues in Objective-C/Swift components and upgrading SDKs for iOS 18 compatibility.
- Resolved critical issues in legacy Objective-C and Swift components, reducing automation crash rates by 15% and boosting test stability.
- Designed scalable SDK architectures, reducing onboarding time by 30% and improving test stability with a 15% drop in automation crashes.
- Upgraded the Filestack iOS SDK for iOS 18 compatibility, modernizing the codebase by updating the deployment target and replacing deprecations
- Enhanced automation frameworks, adding native Swift support to Ranorex and leading Flutter SDK integration for cross-platform UI testing.

iOS Developer Intern

Celestial Systems

Sep 2023 - March 2024

- Implemented a ChatBot feature using Swift and SwiftUI to simulate debate conversations between two chatbots.
- Supported feature development using the MVVM architecture, resulting in a 15% improvement in app performance.
- Optimized button functionality, reducing execution time from 7 seconds to 2 seconds.

PROJECTS

Ranorex Swift Support

<https://www.ranorex.com/blog/seamlessly-test-swiftui-apps-with-ranorex-studio/>

- Added native Swift support in the Ranorex UI testing library, enabling seamless automation for iOS applications built with Swift and SwiftUI.
- Developed testing hooks and API bridges to integrate SwiftUI views into the existing Objective-C based testing engine.
- Ensured compatibility across multiple iOS versions and Swift language updates to maintain robust automation reliability.

Ranorex Flutter Support

[ranorex_flutteralternative_ios](#)

- Led the development of the Flutter support SDK for Ranorex, enabling cross-platform UI automation for Flutter apps on both Android and iOS.
- Designed and implemented a message-driven communication layer using Flutter platform channels, allowing native automation tools to interact with Flutter widgets.
- Collaborated with QA teams to expand test coverage across diverse Flutter app structures and custom widget hierarchies.

Filestack-ios sdk

[FileStack-IOS](#)

- Upgraded the Filestack iOS SDK to support iOS 18, ensuring compatibility with the latest Apple frameworks and development tools.
- Updated the deployment target from iOS 11 to iOS 14, enabling the use of modern APIs and improving overall SDK performance and reliability.
- Resolved multiple deprecated methods and APIs to align with current Swift and iOS SDK standards.
- Conducted functional testing to verify SDK stability and maintained compatibility across supported iOS versions.

ACHIEVEMENTS

- Get awarded for Ranorex swift support in celestial systems.

SKILLS

- Programming Languages: Objective-C, Swift, Java, JavaScript
- Libraries and Frameworks: SwiftUI, UIKit, MapKit, AVFoundation, Alamofire, Cocoa Touch, Firebase, React-native
- Tools: Git, Github, XCode, VSCode, STS, Eclipse
- Other Skills: MVC, MVVM, CocoaPods, Core Data, Autolayout & Constraint, Data Structures and Algorithms, OOPs

Education

Cetpa info tech Noida

Participated in java full stack development & DSA Problem solving

Dec 2022 - July 2023

A.K.T.U (UP Lucknow)

B.Tech (Computer Science)

july 2017 - Sep 2021

Hobbies

Table tennis, watching movies and exploring new places.
